

**This school is your school. This school is my school.**

**From pre-school nurseries to the universities.**

**From the straits of Dover to the Irish Sea**

**These schools were made for you and me.**

We really cherish those magic moments

When life makes sense and eyes light up

Each child is different but needs the same things

Schools that are full of care and joy

We don't care so much for OFSTED gradings

Or where 'we' stand in global tables

We know full well what progress looks like

Students who love to learn some more

**This school is your school. This school is my school.**

**From pre-school nurseries to the universities.**

**From the straits of Dover, to the Irish Sea**

**These schools were made by you and me.**

But there are people – politicians' bankers –

Who disagree with you and me

So everybody must heed the call now

Stop corporate asset-stripping in its tracks

Public experience trumps private ignorance

'Hands off our schools' is what we ask

No good ever comes from privatisation

Our schools will die if run by them

**This school is your school. This school is my school.**

**From pre-school nurseries to the universities.**

**From the straits of Dover, to the Irish Sea**

**These schools will stay with you and me.**

**These schools will stay with you and me.**
